CLADCO DECKING

SOLID COMMERCIAL GRADE
Composite Decking Board 2.4m

Cladco commercial composite decking boards can be fitted either way up, one side with a flat surface and the other with narrow spaced grooves. They recommend the latter due to its anti-slip properties making them especially effective in wet weather conditions. The multi-grooved side is also more appealing when it comes to staining and watermarks, which are more noticeable on the flat side. In general, the composite decking boards require very little maintenance and are easy to clean when required.

Our 4m solid commercial grade composite decking boards are FSC certified and are made from 60% recycled hardwood fibres and 40% high grade recycled polyethene, bonding agent, additives and tint. They also come as standard with a 10-year factory backed warranty for added peace of mind.*

All Cladco composite decking products are available as FSC® certified for the same cost. If you require FSC® certified products please ask for these when placing your order.

Why Our 2.4m Solid Composite Decking Boards Could Be Your Solution

Compared to hollow-core deck boards, Cladco solid composite deck boards have much better strength and sound quality properties, making them great for any situation where they will be subject to large loads and general heavier usage. Solid composite decking boards make ideal use for commercial purposes, giving extra reliability when it's needed.

SPECIFICATIONS	
Board Length	2.4metre
